COMBINING A RACK AND TRUCK BED COVER HAS NEVER BEEN EASIER

Creating more storage options and overall cargo space for your pickup truck, **ELEVATE** Racks and TS Rails will help deliver maximum fun and adventure for all.

Be it soft or hard, rolling or folding, this unique truck rack system allows for the installation and full utilization of many premium inside mount truck bed covers.

First, determine the right rack based on the truck type:

- With a wider crossbar profile (76" width), the **ELEVATE FS RACK** can be paired with Full-Size trucks, Jeep Gladiator, Nissan Frontier and Toyota Tacoma
- With a narrower crossbar profile (67" width), **ELEVATE CS RACK** can be paired with Ford Maverick, Ford Ranger, new Chevy Colorado and GMC Canyon

Next, determine the length of the truck bed and required rail length:

- The **ELEVATE TS RAILS** are available in a variety of lengths to fit a multitude of truck beds
- Tie Down Kit (set of 4) included with Elevate TS Rails

Please note that if your truck bed cover comes equipped with an integrated t-slot channel, simply slide the **ELEVATE FS or CS RACK** directly onto the truck bed cover rail. The use of **ELEVATE TS RAILS** will not be required.
